SUMMARY

Senior Fullstack Developer with 7+ years of experience building scalable, high-performance web applications. Skilled in TypeScript, React, and Node.js, I bring deep frontend expertise alongside solid backend experience with NestJS, DynamoDB, PostgreSQL, and AWS serverless environments - including leading the decoupling of a monolithic architecture into independent microservices. I have a strong track record of owning features end-to-end, from component design and state management through to API development, cloud infrastructure, and CI/CD. I actively leverage AI-assisted workflows (Claude Code, Cursor) to deliver higher quality work faster. Adaptable and collaborative, I thrive in distributed teams working on meaningful, real-world problems.

SKILLS

- Typescript / Golang / Python
- React / Svelte / React Native
- NextJS / Tanstack Start / SvelteKit
- AI tools (e.g. Claude Code, Cursor)
- zustand / react-query / redux / MobX
- Tailwind / ChakraUI / MaterialUI
- Node / Nest / Express / Fastify / Bun / Elysia / Prisma / TypeORM
- DynamoDB / Postgres / MongoDB
- Jest / Cypress / testing-library
- AWS, SST, Seed, Docker
- ...and many others

PROFESSIONAL EXPERIENCE

Freelance Contractor

Senior Software Engineer *with React, NextJS, NodeJS, TypeScript, MobX, react-query*

Oct 2025 - Present

Building scalable, maintainable UIs with a focus on performance and clean architecture, working across the full frontend lifecycle - from component design and state management to testing and CI/CD integration. Leveraging AI-assisted workflows to deliver higher quality work faster.

Tech Quarter

Senior Software Engineer *with React, NodeJS, TypeScript, REST APIs, NextJS, TailwindCSS, AWS, IaC (SST)*

Oct 2021 - Oct 2025

- Helped my team "revitalize" the UI of an app which has not seen technical updates for over two years.
- Migrated a NextJS app to a microfrontend architecture using single-spa and SST, as well as set up CI/CD pipelines for all the MFEs using Github Actions and Seed.
- Led the development of the client's first self-contained system by decoupling the API, UI, and database from the monolithic architecture, transitioning them into a microservice and microfrontend structure.

Endava

Frontend Developer *with React, NodeJS, TypeScript, accessibility-focused HTML*

Mar 2021 - Oct 2021

Improved the accessibility of the website of Great Britain's biggest groceries and general merchandise retailer, ensuring the best experience for users with visual impairment. Initiated and migrated a big part of the website from JS to TS.

iColdo

Frontend Developer *with React, Redux, NodeJS, JavaScript, MaterialUI, AntDesign, TailwindCSS*

Aug 2019 - Mar 2021

Contributed to a diverse range of projects, managing up to three simultaneously, across startups and established e-commerce companies, including both greenfield and legacy applications, such as:

- Web app for a Swedish automotive startup, streamlining the car buying/selling process;
- Web app for managing the fleet and deliveries for Romania's largest home improvement hypermarket;
- Dynamic property portfolio platform for a luxury rental company in the UK.

PERSONAL PROJECTS

ivisign ([FE](#), [BE](#))

Developer-friendly document signing platform.

Technologies: TS, React, Tanstack Start, React Query, TailwindCSS, NestJS, Prisma, PostgreSQL, Railway etc.

LeadFinderHQ ([codebase](#))

Web app for discovering sales leads through keyword and location-based searches.

Technologies: TS, NextJS, react-hook-form, SST, AWS, etc.

...and some other projects are available [here](#)

EDUCATION & CERTIFICATIONS

AWS Certified Cloud Practitioner ([link](#)) May 2023 - May 2026

Master's Degree in Biodiversity Conservation 2017-2019
"Alexandru Ioan Cuza" University, Iasi, Romania

Bachelor's Degree in Ecology 2014-2017
"Alexandru Ioan Cuza" University, Iasi, Romania
